LOGO POSITIONING

The CribWise logo is governed by a set of standards designed to uphold the standards of our brand. These standards help to support our position as a world leader in inventory management. They should be strictly followed and executed throughout all mediums.

Clear space

In order to ensure that the logo is given the space it needs within a given area, a clear space zone (indicated by the X) has been established, within which no other graphic elements should impede.

LOGO ON BACKGROUNDS

The ideal graphic environment for the CribWise logo is against a neutral, white or light-colored background.

In the case that the darkness of a given background exceeds the equivalent of a 50% black screen, the reverse (white) version of the logo should be utilized to allow it to achieve its desired presence on the page.

DON'TS:

- 1) Never change the proportions of the logo vertically or horizontally or alter the appearance of the logo in any way
- 2) Do not rotate the logo
- 3) Do not alter the logo type style
- 4) Do not change the size relationship between the logo symbol and logo type.
- 5) Do not change any colors of the logo.
